

The committee on commerce reported concerning the application of J. H. McDonald for a site for a vinegar and pickle factory to the effect that no suitable site was available, but that water and light would be supplied at the same rates as given other industries.

Major Beale, chief of police, applied for permission to erect three special officers during the fair. The necessary permission was given.

R. W. Lines, architect for the West end fire hall, drew the council's attention to the necessity of placing insurance on this building. The matter was referred to the commissioners.

A petition for the extension of the sewer and water main on Eleventh street from Jasper to Victoria, was presented and was approved. The estimated cost of the work is \$1,000.

A petition was also received from W. H. Ramsay for an extension of the sewer and water in the lane between Tenth and Eleventh streets, north from the corner of Victoria, some 100 feet. The estimated cost of this work is \$200. It was authorized.

The city medical health officer drew the council's attention to an ambiguity in the law regarding the purchase along the line of sewers and water mains to make sewer connections. The bylaw says only that connections must be made. The medical health officer stated some restaurants were taking advantage of this clause and interesting it to the city.

The city solicitor advised that the city was not liable for damage in the claim of J. M. K. Dickson, the cellar of whose house on Nanaimo street was flooded, by what Mr. Dickson considered was the faulty installation of the water service pipe. The city engineer's opinion was that the city was not liable for damage in the claim of J. M. K. Dickson, the cellar of whose house on Nanaimo street was flooded, by what Mr. Dickson considered was the faulty installation of the water service pipe. The city engineer's opinion was that the city was not liable for damage in the claim of J. M. K. Dickson, the cellar of whose house on Nanaimo street was flooded, by what Mr. Dickson considered was the faulty installation of the water service pipe.

The plans and specifications of the new power station were examined. Acting Commissioner McKinnon in a report recommended that tenders be called for both a brick and concrete building. The original plans call for a reinforced concrete building, but McKinnon thinks a brick building may be substituted. He explained that brick is cheap this year, and a reduction in the cost of the building, if brick is used, may be realized.

This question was referred to the commissioners. The auditor's report was approved, and the contract for printing 500 copies was awarded to the Bulletin. There were nine tenders, as follows:

Edmonton Bulletin, \$8.75
Wright Co., \$9.00
Courier de l'Ouest, \$10.00
Alberta Herald, \$12.00
Journal Co., \$12.00
New Publishing Co., \$12.00
Advertising Print and Pub. Co., \$12.00
Dugdale Co., \$12.00
Armstrong Bros., \$12.00

The city solicitor reported in connection with the acting city engineer's suggestion, to formalize the Great Train Pacific in laying the street tracks across the railway, and main taining them under the railway, that this was a matter entirely within the jurisdiction of the railway commission.

It was subsequently stated by Acting City Engineer Lathorne that the plan of the G. T. P. show the crossing at Nanaimo and Kinslome, same level as the C. N. R. In view of this fact the council cannot have any advantage in burying the track and paying through the track.

The proposal to defer the laying of the street railway tracks and main taining them under the railway, that this was a matter entirely within the jurisdiction of the railway commission.

The result is that the work will be proceeded with just as soon as the sewer is completed. It was argued that the objection was not that the sewer could be refilled, but that the earth should be refilled, then need be no danger from settling. When the council decided the work should be proceeded with a new difficulty presented itself. The plan for the laying of the sewer is to commence at the east end and work toward Nanaimo, thus providing a natural drain for the surface water in the excavation, the cost of the sewer being estimated at \$100,000.

The matter was referred to the commissioners with power to act.

Ad. Anderson introduced the question of providing an outlet for the traffic on the late east of Water street and Ottawa avenue. He considered that the city could provide a road and shorter outlet by cutting off a corner and improving Ottawa avenue, then by purchasing the property known as "Water street, which the council decided the Brewery, Jackson's Meadow syndicate owned, and which the syndicate has now offered to sell to the city for \$2,000.

Ad. Anderson continued the syndicate's proposal in the nature of a hold-up, and he favored providing an outlet by way of Ottawa avenue. This was referred to the engineers to prepare an estimate of the cost of the work. The council adjourned to Tuesday, June 30.
